

2 April

Kirk —

1. The CGS "mission" should read, in order to make clear what you said last night:

"The CGS will be the central facility for registering and ~~passing~~ passing to collectors ~~and~~ CIA all-source information requirements."

~~also for~~ (Any or all of the other language,

~~perhaps someone else~~ mine or yours or both, should follow of course).

2. Your <sup>earlier</sup> statement of functions is satisfactory.

3. I must insist on prompt resumption of CGS DD STT cable flow along lines of 6 months ago or appeal matter to DCI today before Bud leaves.

4. While I accept the principle of splitting off some SIGINT people for Ting, I cannot accept the ~~split out~~ split out in your last memo and do my job. This can be worked out easily in detailed talks with Ting and Paul Corel.
